This PDF cannot be deleted

I am sorry for anyone reading this but the PDF you are reading is unable to be deleted from the archive. I apologise for any inconvenience this may cause to you.

The cause of this error is actually due to the binary layout of the archive's code, since this follows Addy's 2D compression, which stores binary effectively virtually in a simulated 2D environment. I will not go into too much detail- but the server reads the compress code and it thinks that the bits are both the code for this system and also an occurrence of a PDF. It is effectively hardcoded into the system.

Furthermore, every non-issued PDF which is hardcoded into the system will be followed by my signature, so while this is not an official pdf, it will forever be one.

With partial appreciation,
The Manual Archive Head - Picasso
